Deadline: 29 September 2026

Nature of assignment	Establishment of the bamboo treatment center (BTC)
Duration	3 Month
Location	Kavre, Bhaktapur, Lalitpur
Published Date	15 September 2026
End date of application submission	29 September 2026

1. About Habitat for Humanity Nepal

Habitat for Humanity Nepal is an international non-governmental organization that is driven by the vision that everyone deserves a decent place to live. Our partnership with communities, governments, private sector including entrepreneurs and financial institutions, youth networks, and academia, allows us to serve low-income families by improving habitability, tenure security, access to basic services and affordability of housing solutions. Our integrated programming serves to benefit 2.7 million people over the next three years, through direct and incremental construction, affordable housing finance, affordable construction technologies and services, and evidence-based policy advocacy for housing adequacy as a fundamental right. Responding to the root causes of inequity in the housing ecosystem, Habitat Nepal leads with a systems-strengthening approach, facilitating development of inclusive housing markets, removing key policy barriers and empowering communities through people-centered approaches, for a stronger and more equitable housing ecosystem.

2. Background

Since 2019, Habitat Nepal has been implementing the "IMPACT 2026" project which is driven by a commitment to scale safe, durable, and affordable bamboo housing solutions. Building on the achievements of Phases I and II, the current phase (Phase III – July 2025 to December 2027) emphasizes innovation, sustainability, and local ownership to meet housing demands while fostering resilient and eco-friendly construction practices.

Through this assignment, Habitat Nepal aims to support individual/ companies/private sector by providing fund and technical support for establishment of the Bamboo treatment center in Bhaktapur/Kavreplanchowk/Lalitpur, in order to promote the use of treated bamboo and enhance the durability of the bamboo structure. The Main objective of this project is to support private sector/ individual to promote in the establishment and operation of a Bamboo Treatment Center.

This Terms of Reference (TOR) defines the work to be carried out by individual/private sector. It provides a brief outline of the project and specifies the scope of work.

3. Project Information

Project Title	IMPACT 2026-III
Project Summary	The project's overall goal is to increase the Adoption of safe (disaster resilient), durable and affordable bamboo housing solutions is significantly increased among the low and middle-income families of Eastern Terai
Project Goal	Adoption of safe (disaster resilient), durable and affordable bamboo housing solutions is significantly increased and mainstreamed into current building practices
Project Objective	Establish bamboo treatment center in partnership with the private sector

4. Objective

The objectives of the assignment are:

- **Core Objective:** Facilitate the process to support a private sector for establishing an operational, commercially viable Bamboo Treatment Center (BTC).
- **Strategic Objective:** Strengthen local bamboo value chains through sustainable market system-driven supply of treated bamboo.

5. Scope of Work

The selected individual or private entity shall undertake the following:

5.1 BTC Infrastructure and Facilities

- Design, construct, and commission core treatment facilities (treatment tanks/vessels, chemical mixing and dosing, drying/curing, storage, handling and loading areas).
- Establish safe material flows separating raw, treated, and finished stock; provide all-weather storage and adequate ventilation.
- Ensure utilities and services (water supply, electrical power, drainage, and waste management) meet environmental, health, and safety (EHS) standards.
- Provide basic worker amenities (washrooms, hand-wash, PPE storage) and perimeter security.

5.2 Operations and Production

- Adopt and document a standardized multi-step treatment process aligned with Manual for Design of Bamboo Structure in Nepal 2025 and recognized bamboo design and treatment manuals.
- Maintain production records (batch logs, input/output, rejection rates), inventory, and dispatch documentation.
- Implement preventive maintenance schedules for equipment and tools.

- Recruit and train Human resources for treatment, quality control, and safe handling.

5.3 Business and Market Development

- Develop a market strategy targeting housing programs, local builders, hardware retailers, and non-housing sectors (e.g., agriculture, furniture, scaffolding).
- Establish pricing, credit, and delivery policies that reflect cost structures and market realities.
- Promote treated bamboo adoption through demonstrations, training support, and participation in local construction events.
- Build linkages with local governments, NGOs, and value-chain actors to expand access to treated bamboo.

5.4 Compliance, Registration, and Coordination

- Coordinate with Habitat Nepal's partner NGOs and relevant government bodies for any required registrations, permits, or endorsements.
- Comply with environmental, fire safety, occupational health, and local labor regulations.
- Participate in Habitat Nepal's orientation on safeguarding and code of conduct.

6. Methodology

Based on the objectives and scope of work, the individual/private sector should propose appropriate methodologies, fund leverage modality, proper business plan, quality assurance plan and

7. Key Deliverables

The following are the expected deliverables for this consultancy:

- Establishment and operation of the Bamboo treatment centre with operational SOPs (Standard Operating Procedures) and safety protocols (within 2 months)
- Production of the treated bamboo poles, or both bamboo wall panels, & poles following the nine-step treatment process as mentioned in the Manual for design of bamboo structures 2025, ready for sale of market use.
- Quality assurance of the treated bamboo poles or bamboo panels for the construction of the structures.
- Business plan and sales pipeline for at least the next 12 months, including target segments and pricing.
- At least 2 market outreach activities (demo/training/product clinics) completed.
